
The TaxShield Checklist is a helpful tool designed to assist you in creating your own depreciation schedule, in conjunction with Urban Consulting Pty Ltd and the innovative TaxShield system.

Print this document and conduct a simple inspection of your property, noting the number or size of all items present.

TaxShield relies on the accuracy of the information you provide. Under the ATO's self-assessment rules, you are responsible for the lodgement of an accurate tax return. TaxShield provides the framework and professional support for you to create your own comprehensive depreciation schedule comfortably and easily. Estimated or average costs will be provided for all items of unknown value. You will have the option to enter your own values for these items upon lodgement into TaxShield. Please remember that the final schedule will be based on the information provided and responsibility will rest on you as the taxpayer.

INSTRUCTIONS

To complete the self-inspection, simply measure the number, size, or area of each item as specified.

Items marked 'no.' (eg Air Conditioning - split system) should be counted individually.

Items marked 'm2' (eg Air conditioning - centrally ducted) should be measured as an area.

Items marked 'item' (eg lift) should be counted as '1' if present, or left blank if not present.

If an item was purchased separately to the property itself you will need to provide the date of purchase and the price you paid for the item. For example, you may have purchased a clothes dryer 5 days after settlement, in which case you would need to enter the date and price as shown on the tax invoice you have retained for that item.

Taxation laws clearly explain that those items purchased separately to a property must be claimed at their actual cost, and receipts must be presented in the case of an audit.

General Assets	QTY	Unit	Cost (if known)	Date (if not settlement)
Air Conditioning - centrally ducted		item		
Air Conditioning - Split system		no.		
Air Conditioning - Packaged unit		no.		
Air Conditioning - Room unit		no.
